Commonwealth of Massachusetts.

INSURANCE DEPARTMENT,
BOSTON, Jan. 1, 1881.

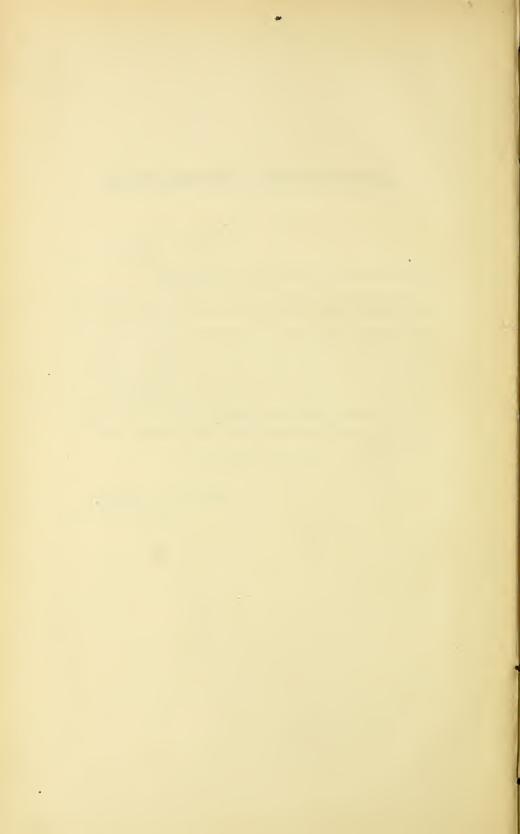

To the Honorable the Senate and House of Representatives.

The volume presented herewith, Part II. of the Twenty-Sixth Annual Report of this Department, exhibits the financial condition and business transactions of all Life, Casualty, and Accident Insurance Companies authorized in this Commonwealth Dec. 31, 1880. As in the case of Companies writing fire and marine risks, the annual statements of those represented in this Part of the Report are submitted in summarized and detailed form, together with other information of interest and importance appertaining thereto, as the statutes require.

Very respectfully, etc.,

JULIUS L. CLARKE,

Insurance Commissioner.

TWENTY-SIXTH ANNUAL REPORT

OF THE

INSURANCE COMMISSIONER.

PART II.

LIFE, CASUALTY, AND ACCIDENT INSURANCE.

COMPANIES RETIRED AND REMAINING.

THE last Report presented the statements of thirty-six Life, Casualty, and Accident Insurance Companies authorized to transact business in Massachusetts. Three have since retired; and, of the thirty-three remaining, twenty-seven are doing a life, and six a casualty and accident, business. With these we include the Travelers' of Hartford, in both classifications, life and accident; and, adding the Massachusetts Hospital Life, now a Trust Company, there will be found thirty-four annual statements in the following pages.

The Companies retired are the Hartford Life and Annuity, March 7, 1881; the Phœnix Life of Hartford, Dec. 28, 1880; and the National Life of the United States, Dec. 11, 1880,—the retirement of the Phœnix being its own voluntary act.

THE HARTFORD LIFE AND ANNUITY.

Mention was made in the last Report from this Department that the Hartford Life and Annuity Insurance Company had been restricted to the transaction in Massachusetts of its regular life business, for which only it was admitted to the State. The restriction was compelled by its deliberate disregard of statutory requirement and obligation, particularly in connection with its coöperative annex, "Safety Fund Department," so called, though in many respects artfully deceptive and less meritorious than the most ordinary

coöperative scheme, and therefore in the worst sense repugnant to the statute of 1872, chap. 325, sect. 7.

In the process of evading this law, the enactment of which was the outcome of a decision of the Supreme Judicial Court (see Commonwealth v. Wetherbee, Mass. Reports, vol. 105, p. 149), the Company defiantly and boastingly procured for its purpose the incorporation in this State of a branch, or agency, through which it might with impunity continue its illegal business. In this proceeding, advantage was taken of legislative generosity in granting special privileges to associations and societies organized under the laws of Massachusetts for educational, religious, charitable, and other purposes; but it was a bold assumption of privilege by the Company, never intended or even contemplated by the Legislature, and in no sense sanctioned by its enactment. Nor was the Company's course justified or palliated in the slightest degree by the subsequent investigation of its affairs before a Committee of the Connecticut Legislature, which resulted in settling nothing of practical importance, except, perhaps, that the subject-matter most involved was more of a judicial than of a legislative character.

But, as the final result of its open and very manifest violation of the terms of its license and of the laws of this State, the Company's authority to transact further business therein was wholly revoked. In justice to gentlemen named among the corporators of its Massachusetts Branch, and to any others, it is not supposable that all were aware of the animus and purpose prompting the inception of this scheme. That such was the fact, personal explanations have given unqualified assurance.

We need only to add, that when, in a spirit of liberality and beneficence, the Legislature extended special and important privileges and exemptions to the class of organizations referred to, it was not for a moment supposed that any such advantage would be sought, or that its action would be made a cloak for the violation or evasion of other statutes. The very thought is preposterous. Were it even technically warranted, which is not the fact, then the sooner effectual modification or repeal follows, the better will it be for the protection of citizens of the Commonwealth.

THE NATIONAL OF THE UNITED STATES.

The authority of the National Life Insurance Company of the United States to transact business in Massachusetts has also ceased during the year. The reported questionable manipulation of its assets, in regard to which information was asked, but withheld by its officers, and the equally questionable procedure of pretended agents to frighten its policy-holders into a surrender of their claims for a fraction of their value. was a sufficient forfeiture of its right to do business. "freezing-out" process adopted by the Company in this and other States is discreditable and heartless in the extreme, and is damaging almost beyond estimate the interests of legitimate life insurance. Policy-holders have rights as well as Companies, and such rights are entitled to equitable recognition. But when the reasonable comities of business are ignored, and policy-holders literally robbed under cover of the flimsiest of technicalities and pretences, the provocation of distrust and condemnation should occasion no surprise.

THE CONTINENTAL LIFE.

In the last Report to the Legislature it was stated that the authority of the Continental Life of Hartford, Conn., to transact new business in Massachusetts had been revoked, "because of incorrect statements of its assets and liabilities, - the former having been largely overstated, and the latter considerably understated, - its actual condition showing such impairment as to compel the action reluctantly taken by this Department." Although the fullest measure of leniency and delay which propriety and courtesy could possibly warrant was extended in all good-will towards the Company, as both record and correspondence abundantly show, yet its representatives have busily promulgated the statement that the revocation was prompted by personal considerations, and that the Department has now come to see that it made a mistake! It is only necessary to say that neither assertion bears the slightest shadow of truth. The revocation was demanded by law, and became all the more imperative upon the Company's own admission of incorrect returns. The treatment of its policy-holders, not a whit more justifiable than that adopted by the Knickerbocker, the Charter Oak, the National of the United States, the just exploded Universal Life, and some others, all of them heretofore excluded from the State at various dates, gave additional reason for retiring the Continental. The only mistake, if such it can be termed, was delay in final action.

AN ENCOURAGING RETROSPECT.

It was stated in the last Report, that seven of the Life Companies from other States authorized in Massachusetts in 1853 were still occupying the field, their aggregate business having increased in amount insured from \$65,984,071 at the beginning of 1853 to \$666,392,463 at the commencement of 1880, — an increase of more than tenfold; and in amount of admitted assets at corresponding dates, from \$6,821,942 to \$194,724,578, — an increase of more than twenty-eight-fold.

These seven Companies were the Mutual Life, Manhattan, and United States of New York, the Connecticut Mutual, the Mutual Benefit of New Jersey, the Union Mutual of Maine, and the National of Vermont.

Between 1870 and 1875, as was also stated, all these Companies, as shown by their returns, were carrying much greater amounts of insurance than at the beginning of 1880. All but two of them were largely in excess during the entire period of six years; and one of these two, the Mutual Life, was carrying upwards of three millions more in 1874, and upwards of six millions more in 1875, than at the beginning of 1880; while the other, the National of Vermont, was considerably in excess during the last four of the six years named. An average aggregation of all the insurance carried by these seven Companies between 1870 and 1875 inclusive, shows an amount nearly thirty-five millions over that carried by them at the beginning of 1880.

We refer thus to the business of these Companies because they are the only ones from other States now left that were authorized in Massachusetts in 1853, and because its results furnish so good an illustration of the wonderful growth, as well as periodical depression, of life insurance in America. Had annual statements been rendered from their first year of business, still greater contrasts would have appeared.

Another matter of interest is presented in connection with the prediction made last year, that, under the re-action then already inaugurated, these Companies, as well as others, might ere long exceed all previous measure of success. In partial fulfilment, the Mutual Life alone made a gain of more than seven millions in 1880, exceeding by almost a million any previous volume of outstanding insurance; while the aggregate amount held by the seven Companies at the close of the year shows a net gain of nearly six and a half millions. It is a pleasure to know that other Companies are also making great gains, some of them having transacted a larger and more successful business during the last than in many previous years.

While this condition of things is most hopeful and encouraging, it should not be forgotten that only by a judicious and just administration of the great and important interests intrusted to them, can the present managers of American life insurance expect to escape the criticisms so deservedly uttered in condemnation of those who have proved recreant and treacherous to sacred obligations, and the betrayers of confiding patrons. From the record of Companies remaining in Massachusetts, now so thoroughly sifted, and apparently so free from discreditable association, there seem to come welcome assurances that in their ranks the disgraceful scandals which have blackened the history of so many unworthy competitors will find no repetition. That it may be so, no honest official, or anxious policyholder, or trusting dependant, can offer a more appropriate invocation. As the official representative of an Insurance Department, we can only and heartily respond, Amen, and Amen.

INTEREST RATES AND STANDARDS OF RESERVE.

Perhaps few subjects connected with life insurance have been more fully and carefully considered than that involving the requirement of safe and equitable premium reserves. It is not proposed to renew the discussion here, but only to cite briefly a few facts and comparisons suggested by its history, which may have interest as showing that the Massachusetts standard has proved none too high to meet the exigencies of the business.

During the speculative "boom" in life insurance, so notably developed between 1864 and 1873, and during which so

many American Life Companies sprang into existence, only to meet a disastrous and often disgraceful fate, there arose among numerous managers a very strong pressure for lower reserves. The four-per-cent standard long before adopted by Massachusetts, and subsequently accepted by some other States, was then, as now, the highest on this side of the Atlantic; while several of the States had enacted a four and a half per cent, and some had none. It was claimed that a four-per-cent reserve was unnecessarily large, and in many cases oppressive, especially to the younger and weaker Companies, and that the then prevailing and probable future rates of interest fully warranted a reduction.

Many of the advocates of a lower standard were honest in their convictions, and would not then or now encourage any legislation tending to weaken the security of life insurance. Others there were, and not a few, among interested insurance lobbyists, who, as subsequent events have shown, were over anxious to realize, by getting possession of assets which the higher reserve held for the benefit of the assured beyond the amount claimed as necessary security. For their purposes some of them would have forced the adoption of a five or even six per cent basis, and probably others would have been much better satisfied with none at all.

So long as Massachusetts and some other States required a four-per-cent reserve, the alleged unnecessary excess of assets thus locked up could not be squandered nor confiscated. The conversion of the "four-per-centers" came therefore to be regarded as the key to the situation. To secure such advantage by winning over these incorrigibles to the theory of lower reserves, an unrelenting pressure was made upon the first Convention of Commissioners and Superintendents of Insurance held in New York in May and June, 1871, and by adjournment in October of the same year.

As a reminiscence of that gathering, it may be suggested that very few of those gentlemen who represented thirty States in these two sessions are now in charge of Insurance Departments; but it is known that a majority (including some of the most persistent lobbyists) who then advocated reduction, now concede the equity and wisdom of a four-per-

cent standard. The convention was invited to a full and free interchange of views on matters of insurance, and the particular subject here referred to became a topic of engrossing interest. But failure to secure unanimity of action was practical defeat. For improving the privilege vouchsafed in the invitation, and for his conscientious adherence to the higher basis, the Massachusetts representative was charged with "ill grace," and was otherwise almost mercilessly handled by some whose pet scheme was the half-matured and now generally condemned American Experience Table, at either four and a half, or five, or six per cent. Fortunately he has survived long enough to find the correctness of his position acknowledged and vindicated, and that, too, by most of his opponents of that day.

In verification hereof, current history is replete with conclusive data, which, were it necessary, might be cited in almost indefinite limit. One or two tabulations, however, may suffice. In order to disarm all possible implication of unfairness, and to present the most favorable exhibit in defence of lower reserves, we select the experience of twenty-seven Life Companies doing business in Massachusetts for five years consecutively (1876 to 1880 inclusive), taking for this purpose their mean amount of cash or income-producing assets, with interest received and accrued, also their mean amount of premium reserves, with interest to be accumulated thereon at four per cent, and the surplus remaining for dividends to policy-holders. Here are the results:—

	Cash Assets,	Interest	Rate	Premium	Four-per-cent	SURPLUS INT FOR DIVID	EREST
YEAR.	Mean Amount.	Received and Accrued.	per cent.	Reserve, Mean Amount.	Interest to be accumulated.	Amount.	Rate p. ct.
1876.	\$333,877,240	\$22,167,931	6.64	\$306,599,463	\$12,263,979	\$9,903,952	3.23
1877.	348,779,984	22,042,732	6.32	318,883,979	12,755,359	9,287,373	2.91
1878.	358,871,450	21,219,954	5.91	325,752,489	13,030,100	8,189,854	2.51
1879.	367,931,773	21,376,536	5.81	331,813,723	13,272,549	8,103,987	2.44
1880.	381,200,433	20,472,387	5.37	341,618,119	13,664,725	6,807,662	1.99

This exhibit is significant and instructive. It will be observed, that, with income-producing assets increased nearly nine per cent since 1876, the rate per cent of interest received

and accrued has fallen more than one and a fourth per cent, and the surplus of interest for dividends to policy-holders in very nearly the same ratio, that for 1880 being only 1.99 against 3.23 in 1876. With this steady decline year by year in interest rates, falling from the eight to twelve per cent claimed in 1871 by many lower-reserve advocates to 5.37 in 1880, followed by corresponding decrease of surplus for dividends, it is not difficult to foresee that there may be imminent approach to impairment if present conditions continue. Policy-holders complaining of reduced dividends will find in these telling results substantial reasons for disappointed expectation.

Recognizing the ability of Life Insurance Companies for making money honestly, and paying their debts at maturity, as resting largely in our American rates of interest, an Ex-Superintendent of Insurance, long and most honorably identified with its interests,* well said in his address before the Convention of 1871, that "a half per cent or one per cent is enormous in its potential power for the safety of Life Insurance Companies, after the lapse of a few years." Whatever of force the remark may have had in favor of lower reserves at a time when interest rates were almost fabulously excessive, the decade just closed has certainly given it potential power in favor of higher standards, and especially so with ruling rates reduced to three and three and a half per cent on government and other first-class securities. significant fact in the same connection is, that the Companies are, in the main, only just beginning to feel the effect of declining rates: for, as their older and more fortunate investments expire, less favorable opportunities will be presented for the realization of large per cents.

In exceptional cases, however, a small number of Companies whose investments were placed on long terms and in better times may continue for longer or shorter periods to show more favorable results; but with the present outlook, so suggestive of increasing taxation, of expenditures enhanced by new and varied contingencies, and of other financial burdens necessarily accruing, it must be apparent, that, even in exceptional instances, average interest accumulations can exceed only by a mere fraction, if at all, the four percent required by law.

^{*} Hon. William Barnes of New York.

But in another, and properly the more pressing and practical view, it may become a serious and vital question whether even a four-per-cent reserve will long suffice for the protection of outstanding risks. It was stated in the Eighteenth Massachusetts Life Report, as far back as 1873, that accumulating evidence in favor of a four-per-cent standard was even then assuming such importance and strength, that probably nothing short of a radical and permanent advance in ruling interest rates would again prompt any reduction in premium reserves. Of the manifestly greater importance and strength of similar evidence now existing, as shown by facts here cited, the reader may easily judge.

INSURANCE WRITTEN, ACTUAL AND COMPUTED RESERVES, SURPLUS, ETC.

In connection with interest accumulation and reserve liability, a brief review from another stand-point may furnish new and interesting information. Introductory thereto, we select the experience of the twenty-seven Life Companies which have done business in the State for five years consecutively, ending with 1880. The statement covers their volume of business, net assets (including capital where existing), computed premium reserves, with surplus and ratios, for each of the five years. The results are not introduced as being in any view a test of solvency, which they would not be, even if representing individual Companies, but merely as showing their average condition in the particulars named.

The pretence that a high ratio of assets to liabilities is in all cases evidence of superior strength and soundness, is a fallacy which has been fully exposed in previous Reports. It is only when a decreasing ratio of net assets to computed premium reserve is close upon or likely to pass the line of impairment, that such a matter may assume any vital importance. Among the Companies which have ceased to exist, very many were those having the largest ratios; while others with the smallest have continued to grow in strength and usefulness, and are now counted with those most honored and reliable.

The exhibit herewith presented, and the data which follow, will show some of the remarkable fluctuations which American life insurance has experienced in its periods of greatest prosperity and adversity.

YEAR.	No. of Policies.	Amount Insured.	Net Assets, or Actual Prem'm Reserve.	Net Present Value of Poli- cies, or Com- puted Premium Reserve.	Surplus of Net Assets.	Ratio.
1876 .	574,346	\$1,485,943,302	\$349,303,715	\$314,393,981	\$34,909,734	111.10
1877 .	558,783	1,423,100,271	360,358,946	323,373,977	36,984,969	111.44
1878 .	544,954	1,368,162,162	367,811,521	328,131,001	39,680,520	112.09
1879 .	555,919	1,374,946,179	376,783,675	335,496,446	41,287,229	112.31
1880 .	572,669	1,418,266,505	394,352,192	347,892,539	46,459,653	113.35

This aggregation of the business of twenty-seven Companies for the last five years, with the business of all the Companies previously represented in the State, as shown at intervals by corresponding ratios dating back to 1865, discloses some suggestive comparisons. For instance, their average ratio of computed premium reserve to net assets for 1865 was 134.47, which, three years later, dropped to 121.80; in 1870, to 113.16; and in 1873, to 108.23,—the latter the smallest average ratio ever held by Companies occupying the Massachusetts field.

This heavy decrease may be largely accounted for by the fact that so many newly incorporated Companies entered the field during and immediately subsequent to the war, all having in their first years a large surplus of assets, with comparatively small liability. But, with the enormous volume of business so rapidly and so easily acquired in those years, came, of course, a corresponding growth of reserve liability, which, coupled in too many cases with bad management and extravagant expenditure, quickly absorbed a large ratio of net surplus.

How far the almost startling reduction in surplus of net assets, amounting in average ratio to more than seventy-five per cent between 1865 and 1873, was influenced by the last-named causes, we will not presume to say. That they were a power in such direction the unfortunate experiences of that period leave no question. But from its unwelcome record justice requires unequivocal exculpation of those Companies, which, through wise and conservative management, have maintained their integrity and preserved an honest administration, under whose auspices life insurance does insure in its best and fullest sense.

As shown by statistics already cited, there has been a steady and encouraging advance in these last years, the ratio of net surplus for 1880 indicating a clear gain of more than sixty per cent since 1873. And here it is worthy of mention that the Companies now remaining in the State show, individually, a much higher average than when aggregated with those which have retired. An illustration appears in the comparative average ratios of net assets to computed reserves held within the last five years by all the Companies combined, and those in the same years by the twenty-seven now remaining: viz.,—

٠	YEAR	R.		All Companies Combined.	Ratio.	Companies still Remaining.	Ratio.
1876				34	110.24	27	111.10
1877				31	111.10	27	111.44
1878			•	31	111.81	27	112.09
1879				30	112.11	27	112.31
1880				27	113.25	27	113.35

With these general average ratios, it may be of interest to know, that in their separate or Company classifications their range for 1880 is from 103.91 to 316.25, not materially differing from that shown by the same Companies in each of the five years introduced.

But a more noticeable diversity is found in earlier years. Going back, for example, to 1873, when the average ratio reached its lowest figure, 108.23, it will be found that eighteen Companies were in that year below, and twenty-three above, the average; the former ranging from 100.21 to 107.83, and the latter from 108.54 to 181.29. The Company having the last-named ratio, which had been reduced from 224.34 in 1871, and from 403.07 in 1870, had, with its highest ratio, more than four dollars in hand with which to pay each dollar of its reserve liability. Yet this Company was one of the shortest lived of the many which have disappeared from the insurance world, thus showing how utterly fallacious was the pretence made in its behalf, and so often urged by insurance representatives, that a high ratio of assets to liabilities is an infallible

guarantee of soundness and safety, other equally important requirements being too frequently ignored.

Had the Company referred to maintained even a reasonable measure of prudence and integrity, it might have attained growth and prosperity; but its administration was prodigal and rotten. Even its average annual ratio of current expenses was up to 64.95 during its entire existence of nearly five years, only six others out of the seventy-two authorized in Massachusetts between 1866 and 1873 having a higher one. Failure and dissolution were, of course, inevitable. Not only was it so with each of these particular Companies, but such was the fate of every single one of the seventy-two, which, at that period, exhibited the highest surplus ratio; while, significantly enough, all the survivors of to-day were among those having the lower.

But it is not the purpose of this reference to detract a single iota from the financial prestige so properly and deservedly appertaining to large surplus. It is introduced simply and only as a reminder that other conditions are quite as essential to solvency and security: so, therefore, there should be no misconception or misuse of this suggestive history. The real and important lesson underlying the whole has been often presented and exemplified, and its teachings have not been disregarded by honest and faithful managers. Many such there are who have not failed to interpret correctly, and with practical advantage, its ominous handwriting upon the wall: mismanagement, extravagance, and dishonest greed, —the destroyer of cherished hopes, the robber of widows and orphans, and the bane and curse of life insurance.

ACCIDENT, CASUALTY, AND FIDELITY INSURANCE.

Accident Insurance. — The Travelers' of Hartford, the first Company to perfect in this country a scientific system of special insurance of life and limb against accidents, has had only two authorized competitors in Massachusetts for very many years. It re-insured one of these, the Railway Passengers', in 1878. The other, the Fidelity and Casualty of New York, formerly the Knickerbocker Casualty, still remains; and, under the provisions of chap. 130 of the Acts of 1879, is at present restricted here to its accident business only.

Incorporated in 1863, and admitted into this State in the

following year, the business of the Travelers' from the first has shown increasing volume and success, thus indicating a large and popular demand for such insurance. In its earlier history, several other Companies chartered for the same purpose proved unfortunate, and withdrew. Now, however, a foreign Company, the Accident Insurance of North America, of Montreal, Can., proposes to compete for a share of the patronage, and, having complied with legal requirements, is hastening arrangements to commence business.

In the mean time, it is only right that persons desiring this class of insurance should be cautioned against irresponsible and unauthorized associations from other States which are practising their impositions in various sections of the Commonwealth; notably, one from New York, and another from Indiana, both financially unreliable and unworthy of confidence. For self-protection, every person so approached has perfect right to see the agent's certificate of authority from the Insurance Department.

Casualty Insurance. — In distinction from accident insurance of life and limb, four Companies now authorized in the State insure other casualty risks, — two against steam-boiler explosions, and the others against breakage of plate-glass, etc. Their annual statements will be found in subsequent pages of this Report. It is sufficient to say of the present standing of these Companies, that personal inquiry and investigation show them all able to meet the fullest measure of liability which they assume. If in casualty underwriting as much diligence were used in honorable competition as in the cultivation of foolish jealousies and petty rivalries, all interests would be materially propitiated and advanced.

Fidelity Insurance.—The last two or three years have developed a growing demand for this kind of insurance, chiefly among banking and other moneyed institutions, and to some extent among mercantile and other business houses. No Company, however, has thus far been authorized to write such risks in this State.

A former Legislature granted a charter for a local Company with a capital of \$500,000; but, in consequence of failure to secure so large an amount within the statute time, the charter was extended, with a reduction to \$300,000. Even this was not secured, and the charter has now lapsed. Pend-

ing this condition of things, a law enacted by the present Legislature permits the transaction of fidelity or guarantee insurance with a paid-up capital of \$200,000.

The Fidelity and Casualty Insurance Company, changed in name from the Knickerbocker by an amendment of charter in 1880, which gave it permission to write this class of risks also, is an applicant for authority to add the same to its accident business in this State, so soon as its proposed increase of capital to \$250,000 is paid up to the required amount. Meanwhile the Guarantee Company of North America, of Montreal, Can., which is also an applicant for admission to the State, is completing its arrangements for the same branch of business.

PREMIUM NOTES, DEFERRED AND UNCOLLECTED PRE-MIUMS, AMOUNTS PAID FOR CEASED AND CHANGED POLICIES, ETC.

An exceedingly proper and necessary requirement is that calling, at reasonable intervals, for detailed statements of the data expressed in this caption. It is a specific provision of law, and involves annual compliance; but under the discretion permitted by the same statute, and especially in view of the great labor which would be imposed, upon many Companies, the Department has asked for such data only at convenient periods.

The request covering such returns for 1880 has been made of every Company doing business in the State, not one being excused. The law is eminently proper and just; and it was right to ask compliance in the manner indicated, as thereby expense to Companies, and the publicity of official examinations at their offices, are avoided. These particular returns were wanted, not for publication, but simply and only for the private use of the Department in aiding an intelligent verification of annual statements. That work is now in progress; and already the Department is enabled, in some cases, to make important corrections in each of the accounts named, in which, in many instances, errors so easily and almost unavoidably occur.

In the experience of this Department, erroneous statements of premium notes in force, and of deferred and uncollected premiums, all credited in admitted assets, have, when corrected, resulted in a few instances in temporary impairment, and in some others to a very near approach to such condition. This fact is of itself a sufficient reason for the requirement, from which it would not be right to excuse some and hold others. So, therefore, every Company, whether correct or possibly incorrect in rendering these items, should be glad for its own benefit to have them officially examined and verified whenever necessary and convenient.

Reference has been made to the time and labor required for the preparation of detailed statements of such data. Their annual requirement would be burdensome, especially with the larger Companies, and should not be imposed. But, in view of facts and conditions already indicated, every Company, however confident of its own accuracy, can hardly help admitting the propriety and importance of such service, at least once in three or four years. At such intervals it might easily be made to meet, concurrently, the request of any and all Departments desiring the information for their own assurance. Beyond such verification, no necessity could arise, unless in some very exceptional case.

MUTUAL AID AND OTHER BENEFICIARY ASSOCIATIONS.

Under the legislation of 1880, these associations are for the first time making returns to the Insurance Department. It was intended to have included in this Part of the Annual Report a summary of their statements, but the difficulty of securing complete and uniform returns from all has rendered it necessary to delay such publication for a special report. On their part there exists very generally a commendable willingness and desire to comply with the law, both for their own and the interests of all concerned. But so widely at variance are their methods of business and other contingent conditions, that uniformity in returns has not been an easy matter. For this reason, the few which have not yet reported have had permission for delay, till some form of blank better adapted for their use can be prepared. This will soon be ready, and the remaining returns will then be completed. and other difficulties were foreseen from the first, but present experience will secure remedy and promptness in future.

While a large number of beneficial and mutual-aid organi-

zations are honestly and legally transacting their business in the State, and are in good faith complying with its laws, it becomes an official duty to caution the public against many more which have no authority to solicit membership within its limits. Most of the latter are from Pennsylvania and two or three western States, all of them notoriously fraudulent, more so, if possible, than the recently exploded "Ladies' Deposit Bank" in Boston, and equally as deserving of exposure by the newspaper press, which would thereby render the public a material benefit. Those who innocently or otherwise act as agents of these unauthorized concerns are practically obtaining money under false pretences, and are subject to arrest and indictment on complaint of any citizen, the informant in such cases being entitled, under the law of the State, to one-half of the fine imposed, the latter not exceeding five hundred dollars for each offence.

OFFICIAL EXAMINATIONS.

As a matter of public interest and record, it may be stated that two of the oldest and largest American Life Companies have recently passed the ordeal of a searching examination, each occupying several months, commencing in the autumn of 1880 and closing in the present year. One was the Mutual Benefit Life Insurance Company of New Jersey, the examination of which was made conjointly by the Insurance Departments of Massachusetts, Ohio, and New Jersey; that of the other, the Mutual Life of New York, was made under the direction of the New York Department, the Actuary of the Pennsylvania Department participating in the service by the Company's request.

Both examinations were voluntarily invited, and were thorough and exhaustive. With the official reports of both, the public is already more or less familiar. In the results communicated, the policy-holders in both Companies have the assurance that their rights and interests will receive full and equitable protection.

In the case of the Mutual Benefit Life, of which we can speak, of course, from personal knowledge, it is no invidious statement that the examination, the first officially made during its long and successful history, developed an exceptionally satisfactory condition of affairs. The fact is all the more

gratifying in view of the great financial crises and other depressing experiences which have so often and so disastrously affected the interests and threatened the prospects of life insurance. Under the administration of this and other Companies which, with honorable record, have successfully braved similar experiences, it is believed that the peace and welfare of millions of dependants will be sacredly conserved.

RECENT LEGISLATION.

The new non-forfeiture law of 1880, chap. 232, went into effect at the commencement of the present year; and policies issued thereafter are subject to its conditions. The old law, chap. 186 of 1861, ceased at the same time to have further application, except to policies previously issued. A large number of policies extended under the latter have, in numerous cases, many years yet to run; and many more will be added for longer or shorter terms, as lapses occur among those outstanding at the close of 1880. The new statute was fully considered and explained in the last Report, and nothing more may be suggested till its results appear. Valuation Tables in conformity with its provisions are being specially prepared, both for the use of Companies subject thereto, and for that of the Department.

The reduction by the present Legislature of the excise tax from one-half to one-quarter of one per cent, will materially relieve the burden imposed upon Life Companies by the law of 1880, though it will not establish the equity of taxation based on net values. The tax, however, will be borne directly or indirectly by the policy-holders; and its amount will not be likely to diminish by the enactment of further retaliatory legislation, as already proposed in States now without law to enforce in return this particular tax.

THE LIFE BUSINESS OF 1880 v. 1879.

For details of the business of 1880 transacted by Life Companies authorized in the State at the close of the year, reference may be had to the various tabulations and statements which appear in subsequent pages. The following, however, is a comprehensive summary of the business of the same Companies, as compared with that of 1879, and as indicated in the tabulations cited: viz.,—

Table A. — Admitted gross assets, \$402,936,162; increase, \$17,342,302; gross liabilities, \$355,651,706; ratio of assets to liabilities increased from 112.25 to 113.29, — in Massachusetts Companies from 116.66 to 119.58, and in all others from 111.87 to 112.77. Surplus as regards policy-holders, \$47,284,456; increase, \$4,165,305, — of which nearly a million was in Home Companies. It is a noticeable fact, that, while the aggregate income of these twenty-seven Companies shows an increase of less than \$200,000, their expenditures indicate a decrease of more than two and a quarter millions.

Table B. — Net assets or actual premium reserve, \$394,-352,192; computed premium reserve, \$347,892,539; ratio of net assets to premium reserve increased from 112.14 to 113.35, — in Massachusetts Companies from 114.20 to 117.16, and in all others from 112.31 to 113.04.

Table C.— Real estate, stocks, and bonds owned by the Companies, \$172,000,140, appreciation in 1880, nearly eleven millions, with per cent to gross assets increased from 42.06 to 42.95. Loans on mortgages and collaterals, \$180,288,737, an increase of \$4,041,237 over the amount carried by the same Companies in 1879, with present per cent to gross assets reduced from 45.98 to 45.04. Premium notes, \$20,032,321, a decrease in per cent to gross assets from 5.67 to 5.01. These several securities alone, amounting to nearly three hundred and seventy-five millions, constitute more than nine-tenths of the admitted assets, and exceed by almost twenty-five millions the entire reserve liability of the Companies represented.

Table D.—Insurance in force Dec. 31, 1880: policies, 572,669; amount, \$1,418,266,505,—showing a net gain by the same Companies of 16,750 policies, and \$43,320,326 of insurance, over 1879. This is an encouraging development, as is also the fact that the aggregate net loss of more than seven millions in 1879 is succeeded by the handsome gain in 1880.

TABLE E.— Life policies in force, \$1,166,517,567, reserve, \$258,235,137; endowment, \$213,136,646, reserve, \$85,551,712; all others, \$38,612,292, reserve, \$4,682,810. These are substantially in the same proportion as shown in the previous year, the endowment insurance still covering about three-twentieths of the whole amount.

TABLE F. — Death-claims, 7,194; amount, \$20,602,783, — an increase of 307 in number, and \$1,361,344 in amount, as reported by the same Companies in 1879. With this increase, the number of claims to mean number of policies, and the amount of loss to mean amount insured, show a corresponding advance in ratio; the former for 1880 being 1.27, and the latter 1.47. The range in number and amount of claims, aggregated by Companies, shows one to have had only a single loss of \$500, and the largest number by any one Company, 1,174, covering claims amounting to more than four and a half millions.

TABLE G. — Expenses to mean amount insured, the former \$10,051,002, the latter \$1,396,607,615, and the ratio .72, an increase from .67 in the same Companies for 1879.

TABLE H. — Massachusetts business: amount written, \$12,832,389, an increase of more than two and a half millions over 1879, and larger in amount than in any year since 1876, in which year it reached \$12,841,144. The premiums collected on the Massachusetts business in 1880 amounted to \$3,909,353, and claims paid, to \$3,252,983.

^{*} In the Report of last year the following note was appended by the Commissioner to the Company's statement:—

In making up the real estate account for the present statement, the values ascertained by Commissioner Stedman have been retained as the basis, omitting such items as have disappeared during the year, by sale or otherwise. To each of those remaining has been added its appreciation of value during the year, as claimed by the Company; also the property acquired during the year by foreclosure is allowed at the values so claimed. The total value of the real estate thus ascertained is \$11,105,579.22, instead of \$12,622,944.42, as shown in above statement by the Company. The difference, \$1,517,365.20, is carried into "Items not admitted."

[&]quot;This deduction for depreciation from the cost value of real estate owned by the Company is the result of examinations and appraisals made by Commissioners Stedman of Connecticut and Row of Michigan, assisted by experts appointed from or approved by the departments of Illinois and Missouri. The Company claims that so large a deduction, if any at all, was unnecessary; that, from the date of the appraisals to this time (June 1), its property, especially in the Western States, has appreciably improved, and that there will be no loss upon these investments. While it is sincerely hoped that these expectations may be fully realized, yet there seems no justification on that account for disregarding the conclusions of competent and unobjectionable appraisers as to the value of the property at date of statement."

LIFE AND ACCIDENT INSURANCE COMPANIES OF OTHER STATES

AUTHORIZED TO DO BUSINESS IN MASSACHUSETTS, WITH THE AGENTS
ACTING FOR THE SAME, AND THE AMOUNT OF BUSINESS DONE
BY EACH AGENT, FOR THE YEAR ENDING OCTOBER
31, 1880, AS RETURNED TO THE TAX COMMISSIONER, AND BY HIM COMPILED.

It expires, and The Certificate EVERY AGENT OR SUB-AGENT of any Insurance Company not incorporated in this Commonwealth is required by law to procune specifies the name of the Agent or Sub-Agent, and also the name of the Company for which he is authorized to act. from the Insurance Commissioner a Certificate of Authority for each Company for which he proposes to act. must be renewed, on the first day of April in each year.

To guard against the impositions of fraudulent Companies and dishonest Agents, the Commissioner deems it his duty to advise that parties solicited to insure in any Company not chartered in this State should decline to deal with any person not holding the Commissioner's Certificate of Authority.

For list of Agents and Sub-Agents, see p. 142.
